Professor studies frogs in Panama

BY KATELYN DRAPER
Staff Writer

After a full day spent in sunlight, Salisbury University biology professor Ryan Taylor headed out into the tropical forest of Panama every night for a month this past summer.

"You really do become nocturnal," he said.

Taylor has been conducting research on animal behavior with the Tungara frogs, found primarily in the South-Western hemisphere, regarding sexual selection. Taylor was introduced to researching this topic in 2004 while working towards his post doctorate degree at the University of Texas. Taylor partnered alongside Mike Ryan, a biology professor at UT who had studied the Tungara frog for 30 years. Ryan prompted Taylor to research the answer to this question: "how do females integrate vocalization into their mating selections?"

Thus the journey to Panama began as Taylor connected with Rachel Page of the Smithsonian Tropical Research Institute and traveled to the country accompanied by Grant Goldberg and Stephanie Bogle, two seniors studying biology at SU. Taylor, Goldberg and Bogle ventured out into the forest to "the ditch," the primary mating location, every night when it was dark enough for the frogs to come out.

"Tungara frogs, like most frogs, have a courtship where they come down to the pond and vocalize,"

Police crack down on liquor law

BY RACHEL SEGAL
Staff Writer

Thirsty Thursday – everyone knows what it is. It's no secret that drinking is present at Salisbury University as well as colleges all over the country. This is nothing new, but University Police have recently been cracking down on alcohol violations around campus.

SU's 2011 Annual Security Report indicated that more students are being charged with on-campus al-

cohol violations every year. The report showed that in 2009, 127 students were tried by the University Judicial system for alcohol violations. Then, in 2010, there were 180 students charged similarly.

Since 2008, the annual number of students who were charged criminally by the city police for alcohol violations has almost doubled. This data only includes on-campus arrests, which is only a portion of all of the alcohol-related arrests of

'SAD' BEAR

Born in captivity and shuffled among zoos, Gritto struggles to adapt.

BY COREY NETHEN
Staff Writer

The 20-year-old Andean bear brushes his face against a smudged concrete wall and nervously paces back and forth over a worn dirt path or lays outstretched on his back. He ignores the screaming children expecting something a little more ferocious.

But there is more to this sad, furry beast than meets the eye.

Known as "Gritto" or "the depressed bear," he was born in captivity in San Diego and later relocated to San Antonio. The keepers at the San Antonio Zoo attempted to pen him with another male bear, which quickly developed into an aggressive relationship.

Gritto was then put in a habitat adjacent to his old roommate, but the bears' keen sense of smell continued the hostility between the two. Salisbury zookeepers proposed that Gritto's "stereotypical male-bear behavior" was born from his agitation here. When these creatures show such behavior at a young age, it becomes hardwired.

Salisbury Zoo General Curator Ann Konopik described the locked-in pacing behavior of Gritto as "a bad habit, like biting your nails or twisting your hair." Once these fixations are created it becomes natural to carry them out day-to-day in an unconscious manner. They are thought to release endorphins, a reaction caused by other addicting habits in humans such as smoking cigarettes. Combined with the fact that Andean bears are biologically attuned to

Applicants contend for first SU Fulbright award

BY MARY CAPPER
Staff Writer

When the job market is tough, getting foreign research experience in your field with the possibility of working on your graduate degree at the same time instead of immediately entering the workforce is not such a bad idea.

The Fulbright Scholar program is meant for anyone who has not received a graduate degree and is interested in a unique opportunity to perform his/her own proposed research project in the country of choice for about a year.

"It's the worst job market in 70 years, and this is a unique opportunity to do something very meaningful," said Brian Stiegler, director of the Center for International Education at Salisbury University.

An SU student is yet to receive one of these awards, but Stiegler is now making a greater effort to educate the university on the award. Three students are applying for the program this year, and chances of an SU graduate or alumnus receiving one of these awards is on the

rise.

Two of the applicants from Salisbury University are proposing their

"There's no reason to not apply ... The worst they can say is no."
- Michael Wessel

own research projects.

Charles Overholt, a graduate student studying history, is applying to study in Germany. Overholt has never been abroad before, but has proposed a research project to work with a professor at University of Marburg in Marburg, Germany. If Overholt's proposal gets accepted, he will work on transcribing German texts about Hessian soldiers during the American Revolution while taking graduate classes

at the university.

The application itself was not as difficult as finding a contact in Germany who would be willing to work with a student, Overholt said.

"I've done everything I can do," he said. "It's the best application I've ever written."

Michael Wessel, a graduate student studying conflict analysis and dispute resolution plans on doing his Fulbright research in Israel.

Wessel said he plans on receiving a research grant to assist a professor in studying peace and conflicts in a different context rather than just in the United States.

With the Fulbright program, Wessel can obtain a better understanding of what he is studying as well as a more focused idea of where he wants to go next.

After a month of working on his application, a short time considering most applicants work an average of three or four months on their applications, Wessel said he feels confident in his application.

"I feel like I have a really strong application, but it's not something you can do on your own," Wessel

said. "It's not something to be taken lightly; you have to put time and effort into it."

SU is now helping applicants with the application process as well as being a fourth reference.

The final applicant from SU, Vincent Lubetski, unlike the other applicants is not proposing his own research project, but instead is applying for an English Teaching Assistantship. The ETA is a more structured program that puts the applicant in a certain school in the country the applicant is applying for.

"The Fulbright only offers you more opportunity," Stiegler said. As for this year's applicants, "this year may be the year."

Wessel said he is excited for the program and sees no downside to it.

"There's no reason to not apply," Wessel said. "The worst they can say is no."

Although the program offers much to the citizen applying for it, Stiegler said, "the point of it is to promote mutual understanding of people from different places."

Police

Continued from Pg. 1

students at SU.

The security report states that students are in violation of the alcohol policy if they are participating in high-risk drinking, disruptive activity while drinking or illegal consumption by underage drinkers. This policy applies to students on and off-campus.

Chief of Police Edwin Lashley said these policies are enforced for the safety of the students.

"We want to protect the students from harm," Lashley said. "A majority of the assaults that happen to students are caused by drinking."

By stricter enforcement, University Police aim to minimize the negative effects that come from drinking.

University Police have been cracking down on the illegal possession of alcohol on campus.

There have been more alcohol penalties in the past few years than there have been in the past, and students are noticing.

Amanda Henning, a senior who has attended SU since her freshman year, said that police forces have gotten harsher.

"It has gotten to the point where I don't even want to go out anymore because I know the parties will all get busted," Henning said. "It also causes the problem that students have to leave and drive drunk or stay and get a citation."

Strict enforcement on campus by the University Police may not be all bad, however. Since 2008, the annual number of students punished for drug law violations has dropped from 21 to only four cases.

"I think that students are more cautious of the drug laws because there are harsher consequences," said sophomore Emilie Pochop.

"Police involvement for alcohol laws makes drinking riskier, but college students are going to drink no matter what."

University Police have been cracking down on the illegal possession of alcohol on campus.

Bear

Continued from Pg. 1

a large amount of territory, it starts to make sense why Grito doesn't exactly feel at home in Salisbury.

In August 2003, the bear was sent to Salisbury Zoo. Grito developed cataracts in both of his eyes, making the bear blind. It was not a huge downfall for the newest member of zoo, as scent triumphs as the bear's key sense. He also experiences thyroid issues resulting in a hyperactive disorder. While at a first glance this bear may seem severely depressed or anxious, the truth is that this behavior is far from abnormal for captive male bears.

These rituals have been found to be hereditary specifically where Grito was born: the San Diego Zoo. In fact, the actions that he exhibits are common in many zoos.

Factors like humidity play a part in the temperament of Andean bears. Native to the snow-topped Andes Mountains in South America, a

humid day will drive these bears crazy.

The staff at the zoo is working to help their fuzzy friend.

"I do what I can to make him comfortable, and enrich and stimulate him as much as possible," says Konpik, who has worked at the zoo for 29 years.

The keepers hide his food throughout the cage as a conditioning exercise, along with alternating amounts of food, scent tests and rearranging his environment. When the public eye is overwhelming for Grito, he is free to hide behind his "blind area," a shield of long poles where he can hide from visitors. Tests are being done with Andean cubs to prevent furthering of this common behavior.

"If he wasn't given help from the zoo, I really don't think this bear would be alive in the wild," said Salisbury University senior Megan Houston.

The Salisbury Zoo also hosts the oldest-living Andean bear: 37-year-old Poopsie. The Salisbury Zoo is open daily from 9 a.m. 4:30 p.m. Admission is free, but donations are gladly accepted.

Briefly Stated

TUESDAY

Genealogy Talk
SU's Nabb Research Center for Delmarva History and Culture hosts the genealogical talk "Mommy, Where Did I Come From?" at 7 p.m. on Tuesday, October 18. Presenter Ralph Nelson, president of the Sussex County Genealogical Society, addresses issues with genealogy work and strategies to research family history. Using personal experiences as an example, Nelson demonstrates ways to invite serendipity into researching family history. Admission is free and the public is invited. For information call 410-543-6312 or visit <http://nabbhistory.salisbury.edu>.

WEDNESDAY

Mr. Zeta & Cupcakes for Cancer
SU's chapter of Zeta Tau Alpha hosts its annual Mr. Zeta competition at 7 p.m. on Wednesday, October 19, in the Wicomico Room. The event features a date auction, bake sale and special performances by Squawkapella and SU Pom. Tickets are available at the Guerrier Center Information Desk for \$5, and Gull Cards are accepted. Earlier in the day, Zeta Tau Alpha presents its inaugural Cupcakes for Cancer Cupcake Eating Contest noon-1 p.m. in Red Square. Help the contestants fill their donation can, with all proceeds going toward breast cancer education and awareness.

ONGOING- NOV. 14

PACE Food Drive
SU's Institute for Public Affairs and Civic Engagement sponsors a canned food drive to benefit the Maryland Food Bank through Monday, November 14. The food bank feeds nearly 45,000 annually. Donation boxes are located in each academic building on campus. For more information call 410-677-5045, e-mail rsheehan@salisbury.edu or visit the PACE Web site atw.salisbury.edu/pace.

ONGOING- DEC. 16

"Firefest" Exhibit
SU's Nabb Research Center for Delmarva History and Culture presents little-known details and rarely-seen photos of Salisbury's Great Fire of 1886 during "Firefest." The exhibit opens October 17 at the center's gallery and continues until December 16. Included are posters, vintage photographs, maps and newspaper accounts containing information on the history of the fire. A large-scale map of downtown Salisbury with pinpointed locations of the damage is displayed. These visuals help put the path of the fire into perspective. Regular gallery hours are 1-4 p.m. Mondays, Wednesdays and Fridays, closed holidays. Admission is free and the public is invited. For information call 410-543-6312 or visit <http://nabbhistory.salisbury.edu>.

Super Fresh rots away

The grocery store chain closes all Maryland branches

BY STEVEN CENNAME
Staff Writer

Tasty, edible fruit in Salisbury is becoming harder to find.

Last year, finding good fruit was easy because the grocery store Super Fresh was just across the street from the north edge of campus. It was the closest grocery store to campus and now, due to the country's subpar economic situation, that title belongs to Giant, which is a 20 minute walk away.

This is unfortunate not only because Giant is farther away than Super Fresh, but its fruit is far inferior to Super Fresh's. Last year, I stayed healthy eating Super Fresh's delicious, locally grown produce, which I always found to be much better than both Giant's and The Commons' fruit that left a rotten taste in my mouth.

Salisbury lost its best supermarket on July 6 when the city's Super Fresh closed for good. This was a few months after Sam Martin, CEO of

A&P, Super Fresh's parent company, announced in April that the company planned to close 25 Super Fresh stores in Maryland, Delaware and D.C. over the course of the summer. There are no more Super Fresh stores in Maryland.

"These 25 Super Fresh locations are outside A&P's core market and closing them is a necessary step in our efforts to restore the company to long-term financial health," Martin said according to an article by Tiffany Kary on Bloomberg.com.

A&P has been suffering financially for the past two years, according to the site. In 2010, A&P was taken off the New York Stock Exchange because its stock fell 92% during the year. In the fall of 2010, A&P closed the majority of its stores in New England. The company's 2011 losses so far equate to over 95 million dollars.

A&P has filed for Chapter 11 bankruptcy, which means it is given a "reorganization process" to pay off debt. This will allow the company to someday become profitable again. In order to help decrease the company's massive debt, A&P had to sell Super Fresh stores in areas where the company's overall profit was low. Salisbury was one of those areas.

The closing of Super Fresh has saddened many Salisbury University students, including senior Becca Mastripolito.

"It makes us college students have

to rely on the supermarkets that are not as close by. The prices at Super Fresh were also cheaper so we end up spending a little bit more on groceries," she said.

Sophomore Dana Baylis is also unhappy about the loss of the store. "I will miss Super Fresh. I went there occasionally and now I have to go to Giant to get my groceries. It's just a longer journey to spend more money," she said.

Super Fresh's closing has affected other members of the community as well. Local driving instructor Mable Ball is very disappointed about the store going out of business.

"I used to buy all my groceries there. The prices were low. The location was great. I was very sad to see it go out of business. I have a few students in high school and college who worked there and it's very unfortunate to see them lose their jobs," Ball said.

Despite disappointment over Super Fresh's closing, there are still reasons to be optimistic.

The building that Super Fresh used to occupy is vacant, which means there is a possibility that another supermarket will move into the building in the near future. Maybe we will get a Safeway, a Trader Joe's or a Whole Foods Market. But the chances of Super Fresh ever returning to the area are minuscule, so for now we just have to deal with the fruit at Giant or The Commons.

"It makes us college students have

Internet launches new music era

Amid the surge of electronic hits, prevailing rock artists get noticed online

BY ZACHARY HEETER
Staff Writer

It was Dec. 31, 1999 and people feared the end of the world from Y2K. The clock turned to 12 and everyone's fears subsided, but they couldn't see the future of music: the death of classic rock guitar and the birth of underground music's savior, the Internet.

The year 2000 held big hits such as "Bye Bye Bye" by N'SYNC and "Oops I Did It Again" by Britney Spears, leaving us '90s rockers to ask, "where did the guitar go?"

There were still some big rock radio songs like "All the Small Things" by Blink 182, but head-banging rock was being filtered out by hip-hop and pop throughout the 2000s. Now, whenever I turn on the radio, I hear Top 40 garbage or poppy country tunes.

I miss the days of turning on the radio and hearing some big guitar riff like "Smells Like Teen Spirit" or "Everlong."

I asked Salisbury University student Stephen Hall where he thought the guitar would be in 30 years.

"It will be dead; only a few people will play it, but it will be in the underground... electronic music will mostly dominate it," he said.

It seems like Hall might be onto something, because the synthesizer dominated 2010's airwaves with hits like "OMG" by Usher and "Tik Tok" by Ke\$ha.

According to NPR.org, in 2010, of

the top 100 songs, 45 were pop, 16 were rap and 15 were R&B, compared to rock's - if you can call it that - eight. Between hip-hop, pop, rap, techno, trance, electronica and dubstep, a keyboard is dictating the atmosphere of the rhythm.

To find the few exceptions, an adventurer for original music needs to ride the white horse of the new age Internet. Thanks to the global village, music lovers can find a band they would have never heard before and then buy their music online.

The Internet is arguably the reason for record companies failing and TV ratings decreasing. But while it destroys, it also creates, exposing artists like OK Go and Justin Bieber. The power of YouTube, Grooveshark, Pandora and the old Myspace has ushered in the power of the artist who didn't need a record company as a crutch. In this new era, the artist has the power to record, distribute and market their own music.

Dear Jordan,
I am graduating next year with a degree in English. My parents and teachers have never taught me anything about saving, budgeting, or investing money. I don't even know what a 401K is! How do I know what to do with my money once I get a job?
- Clueless

Well Clueless,

The easiest thing to do is instead of actually learning how to manage your money, find a way to make a lot of it so you never have to worry about such silly things. Here is what I suggest:

- Find a good professional athlete and marry him/her. Boys this may be a bit more difficult for you but I'm sure there's a professional female body builder that would love to have a trophy husband.
- If you enjoy a challenge you could go for a famous singer/actor. However, they are a bit more selective when choosing their first or fourth spouse. Instead, I would just try to get knocked up by one and nab 18 years of child support. Again, sorry fellas.
- I hear high-end escorts (not a stripper or common prostitute—so tacky) make a lot of easy money. If you are going to do it, make sure

- it's with rich clients. They will probably buy you nice things and who knows, maybe it will turn into a whirlwind romance and they'll make a show about you on HBO! Oh wait, it's been done.
- Or you can always go for the classic marrying an old rich man/woman, let them buy and pay for everything under the sun and then collect insurance money when they croak.
- I would NOT suggest becoming a bank robber. There is absolutely no class or integrity in theft.

No, but seriously...

The first thing you need to do is stop blaming your parents and teachers for the fact that the only thing you know how to do is write a story. You are old enough now to wipe your own butt and do a Google search. Here is what I suggest:

- Go onto CNNmoney.com, click

on personal finances and mess around in there. There are tons of articles on how to manage and save your money wisely before and after school.

- Set up an account with Mint.com. It's basically a "personal finance for dummies" account that will keep track of what you spend your money on and give you tips on how to save and invest.
- If you really need someone to tell you step by step how to manage your money how about forgoing that Harry Potter literature course you were dying to take and enroll in a finance or human resources class instead.

Hope this helps Money Bags!

What science says about one night stands

Party Girl Problems Columnist

BY ABIGAIL COLBY
Party Girl Problems Columnist

One night stands: the reason behind why you now refuse to drink tequila on the weekends, the reason you were spotted by that kid in your class walking down the street Sunday morning in four-inch heels, and the common denominator in everything from surprise relationships to surprise pregnancies.

It's no secret that throughout the past decade, casual sex has not only become an acceptable way to engage in intercourse, but even encouraged as a "fun experience" in publications ranging from Cosmopolitan to Women's Health.

It seems that the multitude of contraceptives on the market today, in combination with the rise of a worry-free attitude associated with partying culture, has created a mini-sexual revolution of sorts.

From an activity that was rarely discussed and strictly intended for married couples in the 1950s, to the later inclusion of couples that were dating, to friends with benefits, all the way to that guy who was your lab partner freshman year, it seems the overall standard of whom it is acceptable to engage in intercourse with has taken a nose dive.

Aside from the obvious risk factors, such as an unplanned pregnancy or contracting an STD, what other potential implications does casual sex present from a social and emotional aspect?

It turns out that for girls, our neurological processes put us at an uncontrollable disadvantage to our male counterparts, at least from an emotional perspective, and it can all be attributed to a little hormone named oxytocin.

According to Neil R. Carlson, author of the 10th edition of Physiology of Behavior, this naturally-released chemical, known as the "attachment hormone," is expelled in excessive amounts during activities such as cuddling, childbirth, hugging, kissing and of course, sex.

However, while men's levels of oxytocin rise to around three to five times greater than normal during an orgasm, women's are reported to rise significantly more than this amount, and continue to rise the more often they engage in intercourse with their partner.

This means that although men may often be the ones responsible for initiating and pursuing sex with a woman, her natural brain chemistry causes her to feel a much stronger connection and often times invest more feelings in her sexual partners.

Now, for a gal in a committed relationship, this phenomenon may be beneficial by enhancing the bond her and her significant other share. However, sex with someone she is not romantically involved with or committed to could cause more confusion and sadness in the days and weeks that follow as opposed to the fun and excitement she feels while the act is taking place.

I believe it's safe to say that once any college student is seven or eight drinks deep, the last thing on their mind is their or anyone else's brain chemistry, and despite the fact that alcohol has a tendency to lower inhibitions, it may be time to take a step back and evaluate whether casual sex is worth the physical and emotional risks that accompany it.

SU celebrates National Business Women's Week

BY KORI PITTS
Student Business Leader

Women have made their mark in the business world, and this week, the Perdue School of Business will honor women during National Business Women's Week. NBWW will recognize working women for all that they do in business and celebrate how far they have come.

NBWW has been held annually in the U.S. since 1928, and the Perdue School is excited to take part in the celebration for the second straight year.

"It is an awesome opportunity for our students to gain a sense of empowerment," said Undergraduate Programs Coordinator Tammy Donaway. "NBWW has provided our students with the opportunity to not only hear from, but also connect with women in business. It's a priceless experience. Often times many of us need to be reminded that we can."

Running until Friday, Oct. 22, the celebratory week will feature a variety of guest speakers and events.

Jennifer Falor, human resources business partner at North America Direct to Consumer Nike, Inc., will be the guest lecturer at the Perdue School of Business' Executive Leadership Series on Oct. 18. The public is invited to join.

This week, the winners of the "You are on Target" leadership award will be announced.

"Target has been a great liaison to the Perdue School," said Perdue School of Business Advising Services Coordinator

Jamie Holmes-Krieger. "They help our students prepare for professional success. The award allows two of our outstanding female students an opportunity to have Target mentors."

Recipients will each receive a \$100 Target gift card, a Target Corporate mentor and recognition as an outstanding Perdue student leader.

In honor of the event, there will be short video interviews

with business women. The event will be conducted by myself, Kori Pitts, and Valerie Sheehan, Student Business Leaders for the Perdue School of Business.

Lisa Woodward, Associate Marketing Manager of Perdue Farms, Dr. Peggy Naleppa, President and CEO of Peninsula Regional Medical Center and Susan Wilgus, owner of Wilgus Insurance were interviewed.

"I felt privileged to meet women with such incredible backgrounds," said Valerie Sheehan, one of the student interviewers.

During NBWW there will be a Women in Business Roundtable on Oct. 20 in the Perdue Hall auditorium from 5-7 p.m. Bookmarks and Shore Woman magazines, featuring Susan Wilgus and Peggy Naleppa, will be distributed to students. There will also be a Facebook contest allowing students to win prizes.

For more information on NBWW events at SU or to view interviews with business women, visit www.salisbury.edu/perdue/.

GREEK SPEAK

Phi Mu wins Chapter of the Year at Greek Assessment Program

BY TIFFANY MCCABE
Panel Correspondent

Salisbury University Greeks dressed to impress as they piled into the Wisconsin Room on Oct. 10, awaiting the results of the Salisbury University Greek Assessment Program (SUGAP) for the 2010-11 academic year.

Each sorority received commendable scores on their annual evaluation of chapter operations, making each chapter eligible for Excellence Awards. Alpha Sigma Tau received the Alpha Chapter of Excellence Award as well as the Excellence Award for Leadership Development.

Delta Gamma was granted the Beta Chapter of Excellence Award and the Excellence Award for Academics.

Zeta Tau Alpha won three awards including Beta Chapter, the Excellence Award for Academics and Leadership Development.

Phi Mu received six awards, including Alpha Chapter and Excellence Awards for Campus and Community Involvement, Ritual, Risk Management and Academics, as well as the Chapter of the Year award.

"I couldn't be more proud of our chapter and how far we've come in the past year," said Phi Mu's Vice President, Nikki Kuhar, in regards to winning Chapter of the Year. "We are honored to receive this award and contribute our success to our hard work and dedication to philanthropy and our sisterhood."

Congratulations to each chapter on their awards and another successful academic year.

SU POMS cheer with Redskinettes

BY LAUREN ANDERSON
Staff Writer

The Washington Redskins lost to the Philadelphia Eagles on Sunday 20-13.

Regardless, the SU POMS felt like winners at halftime.

Salisbury University's POMS team was invited to attend the game to perform with the Washington Redskins Cheerleaders, more commonly known as the Redskinettes, during the halftime show.

Twenty-six SU students went up to the field on Saturday to practice a routine with about 200 other girls from college dance teams during the "Spirit Explosion" event. Each year, the Redskinettes donate one game to school dance teams, and the first 300 people to apply are invited to practice and perform at FedEx Field.

The girls practiced for 5 hours with the Redskinettes on Saturday to learn an entire routine for the game the following day.

The performance was a mix of jazz, pom, and hip hop to Christina Aguilera's songs "Show Me Your Buns" and "The Beautiful People," and "Express" from her "Baroque" soundtrack. SU stood out from the group; they stood in the middle and split the 50 yard line.

Submitted photo

The Salisbury University POMS squad cheers alongside the Redskinettes during Sunday's halftime at FedEx Field

The girls had pink pom-poms and wore shirts to support breast cancer awareness month.

Team member Jenna Goff said her favorite part of the experience was performing in front of a large group, and getting closer to the team.

"If you feel comfortable together, you will work as one

unit instead of separate individuals," Goff said. After performing at the game, Goff said that her favorite part was meeting the Redskinettes.

"They are so beautiful and talented and it was so cool getting to dance next to them," she said.

- Jenna Goff

Captain Jessica Escobar said that the experience was a wonderful opportunity for the POMS to represent Salisbury, and she was honored to be able to perform at an NFL halftime show.

Member Sara Bache said her favorite part was getting to dance with the whole team on the field, and described the whole experience as "unforgettable."

Sea Gull Century gives back to campus

Proceeds will help athletic department purchase new materials

BY SARAH KRAUSS
Copy Editor

Every fall, Salisbury University's campus is taken over by 8,000-plus bikers and their families. They are participating in the Sea Gull Century bike tour, an annual event that fundraises thousands of dollars for various organizations.

The proceeds of Sea Gull Century, which come from registration costs and donations, are donated to large non-profit organizations, such as the Alzheimer's Association and Habitat for Humanity. However, a portion of the proceeds go to on-campus student groups.

Some of the recipients of Sea Gull Century proceeds in the past are SU's athletic department and Physical Plant. These two departments are petitioning to receive some of the proceeds from this year's bike tour as well.

As one of the past recipients, Manager of Facilities and Fitness Programs and Strength and Conditioning Coach Matthew Nein said that Sea Gull Century is fairly consistent about giving back to the students. Last year, his department received \$25,000

of the proceeds and used the money to refurbish gym equipment, such as new elliptical machines and smaller items like medicine balls.

"We would have no way to fund it ourselves," Nein said. "We try to impact as many students as possible with what we get."

This year, Nein said he is hoping to purchase new spin bikes, which cost about \$1,000 apiece, to continue group fitness classes at the University Fitness Center and Mages Gym.

Also in the athletic department, Head Athletic Trainer Pat Lamboni said that the proceeds from Sea Gull Century in the past have supported the training and rehabilitation of SU student athletes. Lamboni has helped with the event every year since its inception by supporting staff and assisting first aid during the event.

"Sea Gull Century has been more than generous to the athletic program," Lamboni said. "You can't ask for a better event for the community."

With the proceeds he will receive this year, Lamboni is looking to improve athletic training services. One of the

items he may purchase is a Biodes Balance System, which is useful in pre-screening and post-evaluating athletes for concussions by checking for balance and equilibrium.

The SU Physical Plant's assistant director for Building Trades James Miller said that last year he used the proceeds to compensate for his department's displacement by the new residence building, Sea Gull Square. His department had to move across Route 13 to South Division Street, and he used the proceeds to purchase bikes to ease commuting to and from campus.

Miller said he will use the proceeds from this year to enhance the safety of outside student events by purchasing safer primary electrical cords.

"Sea Gull Century" increases the opportunities for electrical activities for Registered Student Organizations so people don't get hurt or shocked," Miller said.

Participants of the 2011 Sea Gull Century Kathy and Dave DiMatia, parents of SU junior Marina DiMatia, said although they were unaware the proceeds directly benefit students, they are

happy that the event supports these organizations. The couple biked the 62 mile Princess Anne Metric route.

"People would participate more if they knew it helps the students," Kathy DiMatia said. "If we would have known, we would have donated in addition to the admission fee."

Their daughter has been directly impacted by some of the proceeds through the SU Bellarmine Honors Program. The Honors Program has used its proceeds of \$700 to fund educational museum trips to D.C.

"A lot of times, the professors pay out of pocket for these events and getting extra money prevents that," Marina DiMatia said. "The fact they are willing to (spend their personal money) is why you (should) want to give them money."

Marina DiMatia said that these events are a good opportunity for student organizations to receive money.

"Giving money to organizations benefits students regardless of how they spend it," Marina DiMatia said. "It benefits the whole."

Health Report

BY SARAH WOODS
Health Columnist

Advertisements for the flu vaccine are on television, at the pharmacy, and on the radio. The Centers for Disease Control's guidelines that have been in place since February 2010 state that every person at least six months of age should get an annual flu vaccine.

According to the CDC, 200,000 people are hospitalized each year due to influenza, and 36,000 die.

Hospitalizations due to influenza each year only affect 0.065 percent of the population.

Many Americans choose to opt out of the flu shot due to the small percentage of complications, as well as supposed side effects.

The truth is that the flu shot can have side effects such as fever, soreness and aches, and a person can still become infected with influenza even if they are vaccinated.

A major reason many people choose not to be vaccinated is because of the risk of Guillain-Barré Syndrome, a severe neurological condition that can cause paralysis, which has been estimated to be only 0.001 percent of people who receive the vaccine.

The CDC says that it is especially important for high-risk populations to be vaccinated. A high-risk population is a group who are more likely to experience serious complications from the flu.

"College students are particularly vulnerable to the flu because of living in close quarters and sharing crowded classrooms together," said Jennifer Berkman, director of Health Services. "They also travel to other campuses and communities, picking up the viruses and bringing them back to campus. Vaccination is your best prevention tool."

"Sixty-five percent of all meal plans are chosen by students who don't actually have to have one," said Anthony Cerulli, associate director of dining services. The Commons, catering and satellite dining. "Students decide to go to The Commons completely on their own, and that's saying something."

The Commons has a variety of food choices for students and staff. They can go to ten different kiosks to get food, including the brand new Plato's Plate, which provides organic, vegetarian and vegan cuisines. However, Plato's isn't the only kiosk that serves healthy foods.

"Each kiosk has its own healthy mark to it," Cerulli said. "One hundred percent of the cooking is made right here. We make everything from scratch."

The "Café Express" lists the upcoming foods each week in a printed publication. Each kiosk features its own healthy cuisine, encouraging The Commons-goers to make healthier choices wherever they get their food.

Though many choices are offered at The Commons, manager Douglas Jones said that students have clearly picked their favorites.

"Fried chicken is the most popular out of all the foods," Jones said. "Next is the mac and cheese. We serve these most often because we want to meet the students' needs."

In fact, University Dining

Meats are sent in by Sysco, the largest food vendor in the country. Though prepping meat is very tedious, meat cutter Rose Fontaine loves her job.

"I'm responsible for getting all of the meat ready to be cooked," Fontaine said. "My meat cutting area is like my own personal home. I love it."

Cast recounts 'Cat' challenges

BY JOHN TULLY
Staff Writer

The stage of the Fulton Hall Black Box Theatre is set as a bed-sitting room, lit in southern sunset-yellow as the sultry sound of Billie Holiday floats dreamily over the seats, filling with a buzzing audience preparing for Tennessee Williams' *Cat on a Hot Tin Roof*.

The play, which opened last Thursday, is directed by and features T. Paul Pfeiffer. It stars Jennifer Manning and James Carpenter as husband and wife Maggie and Brick, and features Kaila Ingram, Eric Scott Russell, Cat Chapman, Robert Ackerman, John Posner and James Higgins.

Some of the actors found aspects of this production

challenging. Manning found her character's famous sex appeal to be the most challenging facet of her portrayal.

"I've never really been that kind of girl who can strut about looking hot," said Manning, a senior theatre performance major with nine Salisbury University shows under her belt. "I had to work on getting not only comfortable with James, but mostly comfortable with myself."

Chapman, a sophomore theatre performance major, took on the role of Pfeiffer's character's wife.

"It is somewhat difficult to act with someone who is leading the production because in some ways, once he walks on-stage you are on your own since he cannot really observe

the action from an outside perspective," Chapman said. According to his welcome in the playbill, Pfeiffer's vision is a direct and visceral presentation to the audience - one that Chapman believes has been well received.

"There is sort of this idea people have about a 'good' audience being a large one, but in reality a 'good' audience is

"I've never really been that kind of girl who can strut about looking hot. I had to work on getting not only comfortable with James, but mostly comfortable with myself."

Lennon bus brings recording studio to SU

BY SARA JACOBY
Staff Writer

While many SU students saw the John Lennon Tour Bus on Monday, those that went in were treated to a complete interactive media experience.

Through the 14 years the bus has toured the country, this was the first time the bus made its way to the Eastern Shore of Maryland to educate the students of SU. Measuring in at 13 feet 6 inches in height and 65 feet in length, the bus was hard to miss.

Parked at the south end of Caruthers Hall, students were invited to see for themselves what goes into the educational tours all around the United States.

Aboard the bus, students and faculty were able to see the various rooms and the large set-up of televisions, computer screens and what goes into their recording process.

"The technology was really impressive," said Erica Winter, a junior and member of WXSU. "It was really cool to see." The John Lennon Tour Bus was founded in 1998 to honor singer-songwriter John Lennon. At the various stops, children and adults of all ages are able to tour the bus, and sometimes a lucky few will be able to record an original song with the musical engineers on board.

The bus was designed to offer visitors the opportunity to attend music workshops, studio sessions, record original songs

and benefit from the educational process.

"This is the only mobile recording studio in the world that is a nonprofit and primarily educational," said tour bus engineer Ryan L'Esperance.

L'Esperance is one of the three engineers traveling around the country to promote musical awareness and education. He is joined with Hans Tanner, Kyle Boudour, and their professional driver Chris Walker. The bus and crew travel through the United States 10 months out of the year, from January to mid-November.

The bus has made stops at children's hospitals and music conferences in addition to schools. They have also had the opportunity to work with celebrities such as the Black Eyed Peas.

"Now bands are hiring people like us to record with them on the road because of the convenience," L'Esperance said.

Along with the continuing tours throughout the day, students were encouraged to visit the recording tents located across from the bus. Although there were not any private recordings on the bus, students had the opportunity to record a song in the tents either vocally or instrumentally and then have the demo sent to them as an MP3 later on in the week.

"It's not about creating the next big thing," Tanner said. "It's about giving kids a great opportunity for a day."

Another Round with Diana and Justin

BY DIANA DWYER and JUSTIN ODENDHAL
News Editor & Photo Editor

"Do you know where the wine is," slurred one already-overindulged participant at the Autumn Wine Festival wobbling in front of a sampling each," he said.

The ninth-annual festival featured 22 wineries strictly from Maryland, as well as attendees from across the state. This is part of an ongoing effort by the Wicomico County Recreation, Parks & Tourism to attract visitors.

Compared to the Good Beer Festival last weekend, which was also hosted in Pemberton Park, the average age of participants was older. There were fewer SU students because wine did not seem as popular with the college students as beer. However, it drew a bigger and more diverse crowd than the beer festival, including wine novices and experts alike.

Salisbury University senior Sam Kempf started the day knowing little about wines, but was given the chance to learn while working at the Boordy Vineyards stand.

"I learned about the different types of wine categories and the nuances that encompass each," he said.

Kempf said Boordy harnesses the uniqueness of Maryland by using apples grown and harvested in Harford County in its Chilled Apple wine. The winery advertises its 100 percent apple wine to be "as close as a wine can get to an apple without hanging from a tree!"

From dry to sweet, white to red, the options seemed nearly endless. The samples satisfied any palate.

"The younger, hip crowd goes for the sweet, fruity stuff," observed sophomore Sean Keating, who also worked at Boordy.

This wine festival didn't target

the younger college crowd, but it did provide an opportunity to unwind on the weekend and learn about wine.

"Expert" Advice:

Diana: Support your favorite wineries and keep the bottles in sight of the pourers. They're more likely to keep the samples coming if they know you'll buy ones you like.

Justin: Pick a favorite style of wine and stick with it. If you tell the pourer that your favorite wines are reds, they'll probably take you through the entire line.

Woozy lines

Diana: Joe's Cool Red from Layton's Chance Vineyard and Winery

Justin: Cabernet Franc 2007 from Fiore Winery & Distillery

Students bust a move with Zumba

BY KRISTINA JACKEREAS
Staff Writer

A normal workout may include running on a treadmill, lifting weights, or riding a fitness bike. However, a new trend in fitness training incorporates Latin and international styles of music.

"Zumba itself is a form of choreographed dance set to upbeat, high-intensity music," said University Fitness Center manager Eric Price. "It incorporates cardiovascular exercise through dance and music in a group environment which helps everyone enjoy the exercise."

Zumba-Fitness was created by Alberto "Beto" Perez in Columbia completely by accident, according to Zumba.com. Perez taught aerobics and forgot to

bring his CDs to class. He improvised by using the salsa music mixed tapes that he had in his backpack, and his class seemed to enjoy it.

In the mid-1990s, Perez brought his new fitness style to Miami, Fla. Thus, Zumba was born and changed the world of fitness.

June Krell-Salgado, director of cultural affairs, said that when the department of cultural affairs conducted the Zumba Fitness parties at Holloway Hall, about 80 people, both students and non-students, attended.

"Everyone seemed to have a great time," Krell-Salgado said. "Zumba music is so infectious, uplifting and fun."

UFC Zumba instructor Mandi Waldron said that Zumba is unique from other traditional

forms of exercise.

"Zumba incorporates many different styles of Latin music, including Kumbia, Salsa, reggaeton, and mamba," Waldron said. "We get to make up our own dances, the music is really upbeat which makes it more exciting. Time goes by so fast, and it makes working out actually fun."

Waldron said that boys sometimes take Zumba, but the exercise is mostly favored by girls. Salisbury University students have caught onto the trend and seem just as enthusiastic as Waldron.

"I'm glad that I tried Zumba because it was something different that I wasn't used to," said senior Amanda Chacon. "You move the entire time, so it's a great workout."

Marian Akiwumi photo

A Zumba class dances away the calories during the weekly Monday night session. Zumba is the latest workout craze to take the campus by storm.

Gulls splash Bobcats

BY STEVEN BERSTLER
Staff Writer

In 1963, The Rivingtons released the single, "The Bird is the Word." Now, The Salisbury University Swim teams adopted the song's title as the team catchphrase and are letting the Capital Athletic Conference know, "The Bird is What the Word Is."

On Sunday, the SU men's and women's swim teams opened up their 2011-12 season with victories against Frostburg State University at the Mags Physical Activities Center.

The season was underway with both men's (1-0, 1-0 CAC) and women's (1-0, 1-0 CAC) 200-meter medley relay victories.

Freshmen Taylor Merget and Nikki Brandermarte, along with seniors Kelly Closs and Karen Hessler, took home the victory in a time of 2:16.92.

As for the men, the team of sophomores James Gough and Chris Saul along with freshman Daniel Keller and senior James Preston finished on top with a time of 1:59.56.

SU swam against the undermanned Bobcats (0-1, 0-1 CAC) with 11 different individuals winning races.

Freshman Eric Gillies impressed during his Sea Gulls debut with an 800-meter freestyle victory, nearly four seconds ahead of second place, with a time of 9:55.53. Senior Joe Wisda and sophomore Chris Franklin went one-two in the 50-meter freestyle with a one-tenth of a second spread. Franklin then swam a first-place finish in the 100-meter freestyle in 59.16. Preston (2:14.10) led the Sea Gulls with a 200-meter freestyle victory, along with senior Joe Wallender finishing second at 2:20.12. Gough worked his way to a 100-meter backstroke victory in a time of 1:05.52.

Anh Nguyen photo

Freshman Eric Gillies pulls into the lead during the Mens 800m freestyle race against Frostburg Statue University. Gillies had his first college victory on Sunday.

On the women's side of the pool, six different Sea Gulls came home with a victory. Brandermarte and Merget picked up their first wins as Sea Gulls. Brandermarte (2:43.89) won the 200-meter individual medley while Merget (2:22.89) claimed a 200-meter freestyle victory. Senior Robin Stone swam her way to victory in the 100-meter backstroke in 1:12.41, and Sarah Ault captured a 100-meter butterfly win in 1:11.55.

Salisbury will dive back into the water at Rowan University on Tuesday, Oct. 25. The meet is scheduled for a 6 p.m. start.

Senior Jenna Petrella rounds out the women's top finishers with a 50-meter freestyle victory in 29.92 seconds. Petrella picked up a second place finish in the 100-meter freestyle as Frostburg's Sam Mulvey (1:05.87) outreached Petrella by a second.

Junior co-captain Zach Hayes (second row) scored the first drive within the first minute of the game. Co-Captain Nick Kuhl (flyhalf) scored four drives. Other drives were scored by sophomore David Burnett (prop), junior Ben Snyder (wing), sophomore Jake Fields (outside center), junior Tony Groves (second row), and junior Pat Peroutka (wing). There were several hard hits by sophomore Ethan Reese (flanker-scrum half) and freshman Leland Thomas (flanker). Co-Captain Hayes said he was proud of the scoring by Emory "The Freshman" Pressman (second row).

"Our offense was absolutely blazing," Hayes said. "We handed them the biggest 'L'. The hits were so hard we had smoke coming out of our ears."

The Sharks made it to the Final Four championship at the end of last season, but a loss to Middlebury College knocked them out of the playoffs. They wanted to avenge the loss and regain national status.

The Sharks have an away game on Saturday against University of Maryland Baltimore County. Their first game at home is under the lights on Oct. 29 in a matchup against Georgetown University, another Division II team.

Quidditch: 50% fandom, 50% sport, 100% fly

BY ASHLEY MARTIN
Staff Writer

Which co-ed sport involves full contact, hoops, brooms and a snitch? Most Harry Potter fans would immediately recognize this as Quidditch, a sport based on the hit novel series by J.K. Rowling.

Four years ago, alumnus Dana Alsop and a few others showed up for the first interest meeting to start a Quidditch team at SU. Since then, more students have learned of the sport and decided to become a part of it.

According to the team's captain, James Townsend, almost 60 names are signed up for this year's roster and about 15 to 20 new people show up each week to participate in the games.

"Quidditch is 50 percent fandom and 50 percent sport. Even if you don't like Harry Potter, you can still have fun playing the game," Townsend said.

In contrast to most assumptions, Quidditch is a very active sport. Players are split up into two teams of seven. The object of the game is to score as many points as possible by throwing the quaffle (the largest ball) into one of the three hoops belonging to the opposite team, all while mounted on a broomstick.

"As a die-hard Harry Potter fanatic, it was not only my duty to join but an honor," said Quidditch team Vice President Tyler Yzaguirre.

There are four positions of each team: three chasers, two beaters, a keeper and a seeker.

There is also an additional person on the field, the snitch runner. Both boys and girls are allowed to play in this sport that involves plenty of pushing, shoving, body checks and tackles.

"It's a sport that resembles a mixture of dodge ball, rugby and soccer," Townsend said. "It's the best of all worlds."

The Quidditch team here is also very dedicated to the sport, just like any of the other teams at SU. Despite any circumstance, including weather conditions, students begin to gather every Friday in the Quad. Right before last Friday's game, it was pouring rain outside. Yet, players still gathered at the field to start the game.

"Personally, I know that every Friday at 4 p.m. I clear my schedule in order to hit the pitch," said SGA president Jessica DiPietro.

Even though this game is based on the same game in the Harry Potter series, some come to play just for the thrill.

"Two types of people typically join the team: those who always knew they wanted to play Quidditch, and those who just wanted to try it once and end up joining for life," DiPietro said.

Every Friday at 4 p.m., there will be a group of students, male and female, battling it out in the Quad, all while enjoying a very entertaining sport.

The next game will be played against John Hopkins' University and the University of Maryland on Nov. 29 at John's Hopkins University.

Marian Akiwumi photo

Eric Clark defends the goal, blocking his opponent, Johnathan DeMauro, from the hoops as they play Quidditch on the Quad.

Athlete Spotlight

Randal Smedley

Steven Berstler photo

BY STEVEN BERSTLER
Staff Writer

The 2011 Salisbury University Football team is on an absolute tear. The Sea Gulls are 6-0 and ranked No. 12 in the Division III American Football Coaches Association Top 25 poll. Salisbury's 6-0 start is the program's best since an 8-0 run to begin the 2007 season. SU ranks third in Division III with 363 rushing yards per game, and a big reason why is senior super back Randal Smedley. Smedley leads the team with 456 yards from scrimmage and tied for second on the team with six touchdowns. The St. John's Catholic Prep product sat down with The Flyer to answer a

few questions.

How do you feel about your team's season so far?

"We feel very good and focused. We are very determined to win this conference while still playing with a chip on our shoulder."

What are your team goals for the rest of the season?

"We want to win every game, minimize turnovers offensively and shut teams out defensively. Also, we want to minimize mental mistakes and penalties."

How does it feel playing in a different conference (Empire 8) this year?

"It is exciting because we can set our fate towards an automatic bid to (the) NCAA's with a conference championship."

Do you have any superstitions or rituals before a game?

"I have a normal routine of getting into game mode by sitting by myself for a few minutes. Other than that, I listen to music."

What are your plans after college?

"I would love to play the game of football for as long as I can. So I would like to remain involved whether it's playing, coaching and/or teaching."

Describe your experience at SU over the past four years?

"The experience has been wonderful because of my teammates. It has been a great opportunity to travel with them to different places and play in some big games. I feel very thankful having my college academic and athletic experience here at Salisbury University."

Men's soccer shut out Wesley 3-0

BY MARIAH BAUGHAN
Staff Writer

Excessive winds and an ominous sky served as the backdrop to a perfect night for the Salisbury University Sea Gulls to take out the Wesley College Wolverines. The Sea Gulls added another win to their record (7-2-2, 2-1-0 CAC) with an impressive shut out of 3-0.

Playing with a diamond back four, the defense was pushed up to the half-line most of the first half, giving the offense plenty of chances to score. With several crosses, the Sea Gull offense tested the Wolverine's notable sweeper, Craig Taswell. Finally at the top center of the box, an assist from freshman Matt Greene was awarded to junior Jimmy Mundy where he blasted a shot into the upper left-hand corner of the net.

Throughout the first half, fouls, cards and comments from the Wolverine sidelines were handed out to the Sea Gulls right and left.

"I don't necessarily believe we fouled a lot, the other team just sold it well. When we are fouled, we like to keep playing and try to progress from it," said head coach Steve Clark, who is in his 20th season.

The Sea Gulls continued to invade the Wolverine's defensive territory with carries up the field. With the hustle of sophomore Jake Perry and senior Morgan Hunt, the Gulls had the upper hand in fitness.

"The guys commit to staying in shape year-round. They don't just prepare for the season; they have to

really grind all year long," Clark said.

When the Wolverines did have the chance to take the ball up the field, they tested goalie John Vnenchak. By coming out far and aggressively diving for the ball, the junior provided the team with a shutout.

"I'm never really nervous back there," Vnenchak said. "I just want to make sure everyone is focused. I really trust my guys back there."

The second half of the game started out with a bang from numerous shots on goal. Senior Ian Wilson beat the Wolverine defense by dribbling the ball up the right sideline and passed to junior Phil

Bucheimer. Bucheimer then placed the ball in the back of the net for SU's second goal.

"I've been playing forward since I was a kid. It's all about practice. I stay composed when I'm in the 18 and tap it in," Bucheimer said.

Keeping up the momentum, just 12 minutes after Bucheimer's goal, freshman Cody Webster assisted the ball to forward Matt Greene for another goal, completing the Sea Gull hat trick.

The team will play next on Wednesday at St. Mary's (Md.) at 3:30 p.m. Their next home game is on Saturday at 2:00 p.m. against Hood College at the SU soccer complex.

Sophomore defenseman Adam Quigley returning the ball downfield for a chance to score in the first half of Wednesday's 3-0 win

No. 1 field hockey continues to roll

Womens Field Hockey coach Dawn Chamberlin talks strategy with her players during the routing of Hood College on Thursday, the team won 9-0

The No.1 Salisbury University women's field hockey team (13-0) rolled by the Hood College Blazers (3-8) on Thursday in another conference matchup at Sea Gull Stadium. SU entered the match having never lost to Hood, who came into the game with two consecutive conference losses.

SU flew out of the gates, overwhelming the Blazers. Just beyond 10 minutes into the game, junior forward Erica Henderson began her big night by connecting with junior midfielder Kristina Fusco for a goal, giving Salisbury a 1-0 advantage.

"It was very important to get out and jump on them quickly," said head coach Dawn Chamberlin.

Five minutes later, freshman midfielder Summer Washburn tallied a goal off of a Fusco assist. Henderson would go on to score two more consecutive goals for SU, giving them a 5-0 lead at the end of the first half.

"Our stellar defense, midfield and offense all contribute in getting the ball up the field to provide ample scoring opportunities," said Henderson, who recorded her second hat trick of the season.

In the second half, Salisbury put in the substitutes. Four of them scored, and they continued to load up on pres-

sure and maintain possession of the ball the entire half. Hood was only able to get on offense for a few moments the entire game.

"Today was about maintaining our level of play," said Chamberlin. "It was a matter of doing the things we do well and perfecting them."

Junior midfielder Melissa Slocum and senior midfielder Danielle Lehman each tallied a goal for SU while freshman Kim Markovitz and sophomore Haley Quillen recorded their first career goals, leading Salisbury to a 9-0 win.

"When we stepped on the field in the second half we still didn't let up," Slocum said.

The Sea Gulls will be at Wesley on Wednesday at 7 p.m., but will return home on Saturday to host Frostburg State at 2 p.m. at Sea Gull Stadium.

"It was a great game full of energy and urgency for 70 minutes."

-Melissa Slocum
